STARTER MOTORS & ALTERNATORS

Technical Bulletin 17

AEK2164 IS THE NUMBER FOR PETROL CITROEN C2, C3 AND PEUGEOT 1007

On the above vehicles we now recommend that Alternator AEK2164 is supplied as there have been recent instances where this part number has had to be supplied in order to cure the vehicle fault. Can you please make a note that this part number is *new* and replaces *some* applications where AEA4294 and AEA5202 were listed. AEK2164 is a 90Amp unit that covers where both part numbers were listed for the above vehicles. Please check our online catalogue for further details and the exact applications that Alternator AEK2164 covers.

VAUXHALL CORSA 1.0/1.2 12v STARTER MOTOR

Some customers have had difficulty fitting AES1275 Starter Motor to the above applications due to the length. We can now supply **AEX1043** starter motor for this application, this is a short body length Bosch type Starter Motor. This Starter Motor also fits Vauxhall Agila 1.0/1.2 12v. Please visit our on-line catalogue for full application details.

FORD TRANSIT ALTERNATOR COMMON WIRING FAULT

Mainly on Alternator part numbers AEA4244 and AEA4243, some customers have reported that the battery warning light stays on even after a replacement Alternator is fitted. The common cause of this problem is the battery live feed to the 3-Pin connector plug at the rear of the Alternator, this feed is either corroded in the plug or broken in the loom. The Alternator still charges, but with the battery warning light illuminated.

Please also check Ford Transit Connect Alternator AEK2852 for broken mounting brackets due to incorrect fitment. We are advising all customers to ask fitters to check the replacement unit first before fitting; a warranty note is enclosed to this effect. *See Technical Bulletin 16 for further information about this!*

New Part Numbers to watch out for!

We constantly add new numbers to the range and our On-Line Catalogue is where you will find them first.

For just a taster here listed below are just some of the recent additions to our range:

Alternators:

- AEG1027 – Ford Focus ST 2.5 2005>
